

FITNESSGRAM 8.4

TX PEIMS PFAI: Common Upload Errors and Resolutions

PFAI Upload Error:

Resolution:

“System Error”

Possible Cause:

- **Unassigned Students**
 - + If you have students that aren't assigned a school/teacher/class (i.e. inactive students) you may exclude them from your Research Export by selecting the “School” scope followed by selecting All schools during Research Export.
- **Unassigned Teacher**
 - + Each teacher in FitnessGram will need a specific School assignment. This may be checked on the ‘Teacher’ Details screen in the FG Teacher Application.
- **Missing test dates**
 - + You may obtain a ‘birds-eye’ view of tests that are missing test dates on the ‘FitnessGram’ screen in the FG Teacher application once ‘All’ Teachers and ‘All’ Classes is selected via the drop-down menus.
- **8.3 release or earlier**
 - + You may check the release-version of your FitnessGram software by going to the ‘Help’ menu and selecting ‘About’ in the FG Teacher client.

“x% of your student data have test dates outside of this school year, these records will be ignored”

The school-year term validated against is 9-1-08 through 6-30-09. If you have test scores from previous school years, you will receive this message. The past data will indeed be ignored (disregarded when uploaded).

“Invalid Ethnicity Codes”

Your students have been assigned a non-Texas ethnicity code attribute, or are lacking an ethnicity attribute completely. You may reference the [Ethnicity Data Conversion](#) and [Data Validation/Ethnicity](#) documents.
